

ENVIRONMENT PROTECTION

Quite many past programmes of Project Swarajya had an ecological priority. Project Swarajya has pioneered in the conservation of **Horse Shoe Crab and Olive Redly Sea Turtle in Orissa Coust.** Several publications in this regard were brought out by the organization. The organization had also unleashed a campaign for using the Trawl Guard in place of Turtle Excluder Devices as a better tool for protection of Olive Redily Sea Turtles while maintaining fish catch to the satisfaction of trawl industry in the mixed catch scenario.

In the past the organization had also organized National Environment Awareness Campaign, prevention of Water Pollution in Taladanda Canal, Mangrove Forest Conservation, and Conservation of Coastal Ecology through Setting up Eco Clubs among others.
